## Professional Summary

DevOps, CloudOps, and SRE professional with expertise in cloud and on-prem architecture, automation, and infrastructure management. Skilled in Kubernetes, AWS, GCP, GitOps, Linux, and Infrastructure-as-Code, with a focus on building reliable, scalable, and secure systems. Experienced in leading teams, planning SDLC processes, and implementing modern DevOps practices to improve efficiency and delivery. Proven track record in the finance and gambling/gaming industries, working in high-load, mission-critical environments.

---

## Work Experience

### CloudOps Team Lead - TBC Bank

Jan 2023 - Present · Tbilisi, Georgia · Hybrid

- Led migration from OpenShift to vanilla Kubernetes, designing the architecture and governance model for 30+ clusters
  - Designed AWS architecture and operational model to manage 30+ accounts at scale
  - Modernized development environments by automating provisioning and integrating advanced tools (Actifio -> Delphix) for database virtualization
  - Architected and implemented monitoring solutions using open-source and in-house tools, ensuring visibility and reliability across infrastructure
  - Migrated static content from on-premises to Amazon S3 with client-side rendering, including leading the migration of [www.tbconline.ge](http://www.tbconline.ge) from Kubernetes to an S3-based SPA
  - Standardized delivery by placing all services behind Amazon CloudFront with caching strategies for APIs (including re-engineering selected services)
  - Implemented AWS Shield protections and DDoS mitigation strategies
  - Designed and implemented networking across 30+ AWS accounts, including participating in Direct Connect (DX) setup for hybrid connectivity
  - Enabled seamless integration of banking applications with AWS-native services
  - Authored and maintained reusable Terraform modules and Ansible roles to automate infrastructure and application operations
  - Oversaw and automated monitoring and logging pipelines for both infrastructure and applications
-

## **DevOps Architect - Solvit**

Aug 2024 - Present · Remote

- Designed and implemented DevOps solutions for clients migrating to cloud or on-premises environments
  - Planned and established SDLC processes, working closely with developers to align delivery practices with modern DevOps principles
  - Provided architecture guidance for cloud adoption, infrastructure automation, and migration strategies
  - Enabled organizations to improve scalability, reliability, and efficiency through tailored DevOps roadmaps
- 

## **Lecturer - TBC x USAID “DevOps in Action” Program**

Feb 2024 - Aug 2024 · Remote

- Delivered a comprehensive DevOps course covering Linux, Git, containerization, Kubernetes, CI/CD, cloud platforms, infrastructure as code, and observability
  - Focused on practical, hands-on learning to prepare participants for real-world DevOps roles
- 

## **SRE / DevOps Engineer - Betsson Group (Europebet)**

Dec 2021 - Jan 2023 · Tbilisi, Georgia

- Worked on AWS, Kubernetes, and Linux environments
  - Ensured site reliability for europebet.com in a high-traffic environment
  - Led the full migration of europop.ge from on-premises infrastructure to AWS
  - Implemented and managed monitoring, automation, disaster recovery, and backup strategies.
  - Developed CI/CD pipelines and Infrastructure-as-Code for consistent and efficient deployments.
- Supported microservices architecture in a high-load production setting

## **Intern DevOps Engineer - Betsson Group (Europebet)**

Jul 2021 - Nov 2021 · Tbilisi, Georgia

- Gained hands-on experience with monitoring, site reliability, and infrastructure automation
-

## Product Owner - NGS Lab

Oct 2020 - Jul 2021 · Tbilisi, Georgia

- Designed and maintained the company's internal architecture
  - Acted as Jira Administrator, managing workflows and configurations
  - Oversaw project lifecycle management, from initiation to delivery
  - Coordinated tender processes and ensured smooth execution of contracts.
- 

## Speaking Engagements

- IFCS 2025 - Hands-On: Building a Secure Multi-Account AWS Network with Transit Gateway and EKS
  - AWS Community Day Georgia 2025 - Workshop: Building Multi-Account Networks with AWS Transit Gateway and EKS Custom Networking
  - AWS Community Day Georgia 2024 - Workshop: AWS Direct Connect and Interconnecting Services with On-Prem Datacenters [\[LinkedIn\]](#)
  - Change Inspire 2023 - Workshop: GitOps with Ansible, Kubernetes, and ArgoCD [\[LinkedIn\]](#)
- 

## Skills

- Cloud & On-Prem: AWS, GCP, Hybrid Cloud, On-Prem Infrastructure
- Containers & Orchestration
- CI/CD & SDLC
- Monitoring & Observability
- Linux

## Certifications

- AWS Certified Solutions Architect - Professional

## Languages

- Georgian - Native
- English - Advanced
